

PE/PP管材生产线

PE/PP Pipe Production Line

PE管材生产线主要用来生产大口径聚乙烯、高密度聚乙烯管材，主要用于供水管、燃气管。

The machine can be used to manufacture large-diameter PE pipes and HDPE pipes. This kind of pipes can be widely used as buried or surface water-supply pipes that water temperature will exceed 45~C. It is an ideal product that can replace galvanized steel pipes, cast iron pipes and cement pipes.

Introduction

管材直径mm Diameter	挤出机 Extruder	挤出量kg/h Output	总装机功率kw Installed Power
16-63	SJ-65/33	120	80
75-250	SJ-90/33	300	210
110-450	SJ-120/30	600	330
280-630	SJ-120/30	750	420
630-1000	SJ-150/30	1000	750
